

NEXOPART

simplicity for your lab

When the right partners join forces, great things happen

A Haver & Boecker and Hosokawa Alpine Company

We are NEXOPART

The **next** era of **particle** analysis.

NEXOPART is a young, dynamic joint venture company that will manage all laboratory-related products of both companies under one roof.

Emerged from the two well-known parent companies, Hosokawa Alpine AG and Haver & Boecker oHG.

Both companies have decades of experience in the manufacturing and distribution of products and measuring equipment for particle analysis for the determination of particle size and shape in the premium segment.

Our products for you

Reliable and easy.

NEXOPART offers modern, robust, and easy-to-use products for all of your sieve analysis tasks. This, in addition to machines for preparing samples and for precise particle size and shape analysis.

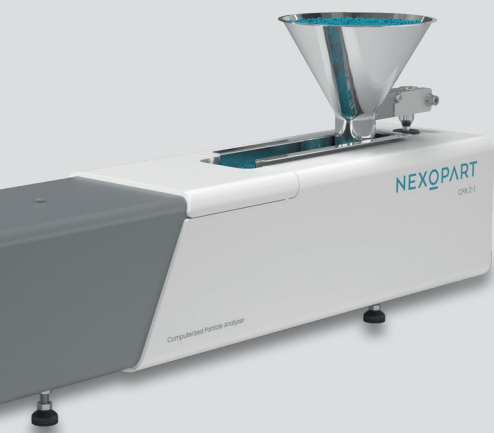

No matter which of our sieve analysis instruments you use, maximum accuracy and reliability of analysis results are top priority at NEXOPART. We offer you a powerful and integrated state-of-the-art overall concept and set new standards in precision, performance, and reliability.

Safety through precision

Particle Analysis of dry bulk material.

Dynamic Image Analyzer

Particle size and shape analysis
Measuring range: 20 μ m - 30 mm

Air Jet Sieve Machine

for the finest powders
Measuring range: 10 μ m - 4 mm

Available everywhere at:

Certified Safety

Service for sustainable quality.

Test Sieves, Test Sieve Machines, and Dynamic Image Analysis are test and measuring devices, which, according to DIN EN ISO 9000 ff, must be certified, and regularly monitored and checked in operation.

For this reason, we provide comprehensive test certificates and service for all our products for sustainable and regulation compliant quality assurance.

“Our goal at NEXOPART is clearly defined: We want to inspire our customers with precision, simplicity and quality.”

Markus Schönwetter, Technical Director at NEXOPART

All from a single source

Strong and dependable.

From coarse particles to fine powders – in addition to products for conventional sieve analysis, NEXOPART offers an air jet sieving machine for very fine powders. All manufactured according to highest quality and safety standards. Since all components and materials originate from Germany and Europe, we are able to ensure more sustainable and shorter transport routes through our secured supply chains. All to the benefit of high product availability and correspondingly short delivery times for you as a NEXOPART business partner.

Maximum quality, long-term reliability and sustainably impressive service – all from a single source:

German Manufacturing at its best.
